Art Unit: 1621

Claims 1-7 and 19-22 are pending in this application. The rejections of the claims under 35. USC 101, 112 and 102(b) as well as the rejection under the judicially created doctrine of obviousness type double patenting are withdrawn in view of applicants' amendments and arguments.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1-7 and 19-22 are again rejected under 35 U.S.C. 103(a) as being unpatentable over the combined teaching of Yedgar et al., US 5,064,817, Chaikof et al., US 6,171,614, and Aoki et al., US 5,470,578, in view of Pruzanski et al., US 6,043,231, Sorgente et al., US 6,162,787 and Falk et al., US 6,022,866, for the reasons of record. Applicants' arguments have been given due consideration, but are found non-persuasive. Applicants show how each individual reference differs from the instant

invention, but under 35 U.S.C. 103, the obviousness test is whether it would have been obvious to do what applicants' did given the teaching of the art taken as a whole. In re Metcalf et al., 157 U.S.P.Q. 423. Yedgar et al., disclose their compounds to be PLA2 inhibitors with utility in treating a wide variety of oversecretory disease states overlapping other of the references. Although the primary references do not disclose treating sepsis, Pruzanski et al. is relied on to disclose PLA2 inhibiting compounds to be useful in treating sepsis and various inflammatory disorders. Chaikof et al. disclose conjugation of a lipid or phospholipid moiety to a GAG and although applicants' point out this is via an ether bond, as opposed to an amide or ester bond, applicants' claims are not limited to conjugation via an amide or ester bond.

No claim is allowed.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
